

Chart Question Answering Reasoning (QAR) Task

Annotation Guidelines (Version 1.0)

1. Introduction

This document provides detailed instructions for annotating Question–Answer–Reasoning (QAR) triples grounded in financial charts.

The objective of this task is to verify:

- whether the question is appropriate and correctly grounded in the chart,
- whether the answer correctly addresses the question based on the chart, and
- whether the reasoning accurately explains how the answer is derived from the chart.

This task focuses on verification and correction, not generating new questions or answers from scratch.

All charts, questions, answers, and reasoning have been pre-generated.

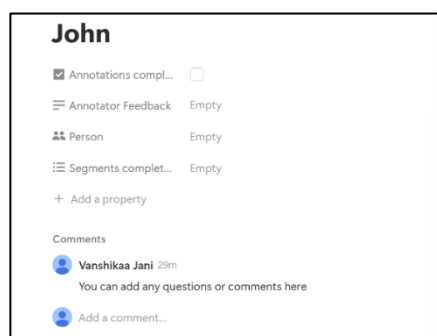

You should read this document carefully before beginning annotation.

2. Onboarding

You will be given access to the annotation workspace during the annotation period. Click on the Chart QAR page. Here you will find the link to the platform and guidelines.

There will also be a table where you will find your name. When you hover over your name, you will find the ‘open’ option. That will lead you to your page (image below)

From the workspace, you will find:

- A link to the **Chart QAR annotation platform** (with password)
- This guideline document
- A checklist for tracking assigned segments

For communication, you may:

- Email questions or completed annotations to Vanshikaa.Jani@mbzuai.ac.ae
 - Leave comments in the shared workspace (Notion)
-

3. Annotation Workflow

You will complete the task using a dedicated online interface.

The workflow is as follows:

1. Login

- Enter your name and password on the login screen.

2. Review Guidelines

- Read this document within the interface.
- Confirm that you have read and understood the guidelines before proceeding.

3. Segment Selection

- Data are divided into predefined segments.
- Begin with the pilot segments.
- Complete all pilot segments before starting remaining segments.

4. Question-Answer-Reasoning Verification

For each annotation item:

- Review the chart carefully.
- Read the **question**.
- Read the **provided answer**.
- Read the **provided reasoning**.
- Complete the three verification tasks described in Section 4.

5. Navigation

- **Previous** allows revisiting earlier items.
- **Save & Next** records the annotation and advances.
- A **progress indicator** shows how many items in the segment are completed.

6. Download

- After completing a segment, download the CSV file.
 - Send the file to the designated email or upload it to the workspace.
-

4. Annotation Task

Each annotation item consists of:

- A **chart**
- A **question**
- A **provided answer**
- A **provided reasoning**

Your task has two steps.

4.1 Step 1: Question Quality

Determine whether the question is appropriate and answerable using the chart.

Select one:

Correct

The question:

- is understandable,
- refers to information visible in the chart,
- is answerable from the chart.

Incorrect

The question:

- is ambiguous,
- refers to information not shown,
- contains factual errors,
- is poorly formed.

You must provide a corrected question.

Uncertain

Choose when you cannot confidently determine whether the question is valid.

4.2 Step 2: Answer Quality

Determine whether the answer correctly addresses the question based on the chart.

Select one:

Correct

The answer:

- is factually correct,
- answers the question,
- is sufficiently complete.

Incorrect

The answer:

- is factually wrong,
- is incomplete,
- misinterprets the chart,
- answers a different question.

You must provide a corrected answer.

Uncertain

Choose when chart interpretation is genuinely unclear.

4.3 Step 3: Reasoning Quality

Determine whether the reasoning correctly explains how the answer was derived from the chart.

Select one:

Correct

The reasoning:

- accurately references chart evidence,
- supports the answer,
- follows logically from the chart.

Incorrect

The reasoning:

- cites incorrect chart values,
- contains unsupported claims,
- reaches the answer through flawed logic,
- contradicts the chart.

You must provide corrected reasoning.

Uncertain

Choose when the chart does not provide enough clarity for evaluation.

5. Use of “Uncertain”

The Uncertain option is important and should be used when:

- chart labels are unclear,
- chart quality prevents reliable interpretation,
- multiple interpretations are plausible,
- the correct judgment cannot be determined confidently.

Do not use Uncertain simply because evaluation requires effort.

6. Principles for Annotation

1. Base all decisions strictly on the chart.
2. Do not use external knowledge.
3. Do not assume facts not shown in the chart.

4. Evaluate each component independently.

A correct answer can have incorrect reasoning.

An incorrect question can still have a reasonable answer.

5. Prefer evidence from the chart over assumptions.
 6. Apply criteria consistently across all segments.
-

7. Interface Reference Guide

7.1 Chart View

- Chart displayed at the top.
- Refer to the chart while evaluating all components.

7.2 Question Section

- Original question displayed.
- Question Quality selector.
- Corrected Question field appears if "Incorrect" is selected.

7.3 Answer Section

- Original answer displayed.
- Answer Quality selector.
- Corrected Answer field appears if "Incorrect" is selected.

7.4 Reasoning Section

- Original reasoning displayed.
- Reasoning Quality selector.
- Corrected Reasoning field appears if "Incorrect" is selected.

7.4 Sidebar Tools

- Progress indicator.

7.5 Segment Completion

- Download CSV file after completion
- Partial progress can be downloaded if needed

- Multiple CSVs may be submitted if annotation is split across sessions
-

8. Quality Expectations

You are expected to:

- Apply criteria consistently.
 - Avoid assumptions.
 - Use Uncertain appropriately.
 - Provide corrections when marking Incorrect.
 - Complete all assigned segment
-

9. Contact and Support

For questions or clarification, contact:

Vanshikaa.Jani@mbzuai.ac.ae

Or use the comment section in the shared workspace on Notion.

10. Completion

After completing a segment:

1. Download the CSV file.
2. Upload it to the designated workspace or email it.

Important:

- Work is not saved automatically.
- Download after each completed segment.
- Multiple CSV submissions are acceptable if annotation is completed across multiple sessions.

Upload the datasets here

Example:

 pilot_segment_1_Vana.csv 6.8 KiB

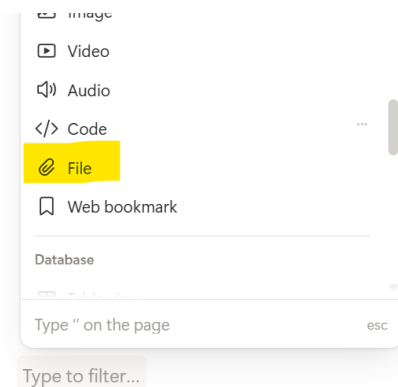

Or email it.

To upload it on Notion:

1. Click on + option

2. Then scroll down till you find “file”

Appendix: Examples and Boundary Cases (Illustrative)

1. All Three Components Correct

Question:

"IMF के अनुसार 2025 में EMDE वृद्धि दर क्या है?"

Answer:

"4.2%"

Reasoning:

"चार्ट में IMF द्वारा 2025 के लिए EMDE वृद्धि दर 4.2% दिखाई गई है।"

Step 1: Question Quality → Correct

Step 2: Answer Quality → Correct

Step 3: Reasoning Quality → Correct

2. Correct Question, Incorrect Answer and Reasoning

Question:

"IMF के अनुसार 2025 में EMDE वृद्धि दर क्या है?"

Answer:

"3.2%"

Reasoning:

"चार्ट में IMF द्वारा 2025 के लिए EMDE वृद्धि दर 3.2% दिखाई गई है।"

Step 1: Question Quality → Correct

Step 2: Answer Quality → Incorrect

Corrected Answer:

"4.2%"

Step 3: Reasoning Quality → Incorrect

Corrected Reasoning:

"चार्ट में IMF द्वारा 2025 के लिए EMDE वृद्धि दर 4.2% दिखाई गई है।"

3. Correct Question and Answer, Incorrect Reasoning

Question:

"IMF के अनुसार 2025 में EMDE वृद्धि दर क्या है?"

Answer:

"4.2%"

Reasoning:

"विश्व बैंक के चार्ट में EMDE वृद्धि दर 4.2% दिखाई गई है।"

Step 1: Question Quality → Correct

Step 2: Answer Quality → Correct

Step 3: Reasoning Quality → Incorrect

Corrected Reasoning:

"IMF के चार्ट में 2025 के लिए EMDE वृद्धि दर 4.2% दिखाई गई है।"

4. Incorrect Question

Question:

"2018 में EMDE वृद्धि दर क्या थी?"

Answer:

"चार्ट में उपलब्ध नहीं।"

Reasoning:

"चार्ट में 2018 का कोई डेटा नहीं दिया गया है।"

Step 1: Question Quality → Incorrect

Corrected Question:

"2025 में EMDE वृद्धि दर क्या है?"

Step 2: Answer Quality → Correct

Step 3: Reasoning Quality → Correct

5. Correct Question, Incomplete Answer

Question:

"IMF और विश्व बैंक के अनुसार 2025 में EMDE वृद्धि दर में कितना अंतर है?"

Answer:

"IMF के अनुसार 4.2% है।"

Reasoning:

"IMF चार्ट में EMDE वृद्धि दर 4.2% दिखाई गई है।"

Step 1: Question Quality → Correct

Step 2: Answer Quality → Incorrect

Corrected Answer:

"IMF के अनुसार 4.2% और विश्व बैंक के अनुसार 4.0% है, इसलिए अंतर 0.2 प्रतिशत अंक है।"

Step 3: Reasoning Quality → Incorrect

Corrected Reasoning:

"चार्ट में IMF के लिए 4.2% तथा विश्व बैंक के लिए 4.0% दर्शाया गया है, इसलिए दोनों के बीच 0.2 प्रतिशत अंक का अंतर है।"

6. Uncertain Case

Question:

"चार्ट के अनुसार सबसे अधिक वृद्धि किस क्षेत्र में हुई है?"

Answer:

"एशिया में।"

Reasoning:

"बार सबसे ऊँची दिखाई दे रही है।"

Situation:

चार्ट की छवि धुंधली है और लेबल स्पष्ट रूप से पढ़े नहीं जा सकते।

Step 1: Question Quality → Uncertain

Step 2: Answer Quality → Uncertain

Step 3: Reasoning Quality → Uncertain

Explanation:

चार्ट को स्पष्ट रूप से पढ़ा नहीं जा सकता, इसलिए विश्वसनीय निर्णय लेना संभव नहीं है।

7. Incorrect Question but Correct Answer and Reasoning

Question:

"चार्ट के अनुसार भारत की GDP वृद्धि दर क्या है?"

Answer:

"चार्ट में भारत की GDP वृद्धि दर का उल्लेख नहीं है।"

Reasoning:

"चार्ट केवल EMDE और वैश्विक वृद्धि दर दिखाता है, भारत की GDP वृद्धि दर नहीं।"

Step 1: Question Quality → Incorrect

Corrected Question:

"चार्ट में प्रदर्शित EMDE वृद्धि दर क्या है?"

Step 2: Answer Quality → Correct

Step 3: Reasoning Quality → Correct
